

Site Tracker — end-to-end test report

Run 09/10/2026, 02:50:04 (Nepal time) against the live Firebase project and Supabase storage · Admin dashboard on localhost:3000 driven in Chrome · Android app on the Pixel 6a emulator (dev build, Metro) driven over adb

74/74 checks passed in total	38/38 permission rules (4 real accounts)	17/17 admin dashboard steps	14/14 mobile app steps	5/5 server-side checks
---------------------------------	---	--------------------------------	---------------------------	---------------------------

Accounts used

Role	Account
Superadmin	superadmin@superadmin.com
Admin (owner)	admin@admin.com (Administrator)
Crew member 1	claudio.test.worker@sitetracker.local (Claude Test Worker) — Test Site Alpha
Crew member 2 (site-mate)	claudio.test.worker2@sitetracker.local (Claude Test Worker 2) — created for this run, Test Site Alpha

Problems found during testing

#	Finding	Status
1	Rules: a check-in/out that had been corrected once could be corrected again without refreshing the "corrected" time (the old editedAt satisfied the rule).	Fixed — every admin correction must now restamp editedAt; rules deployed; re-test 38/38.
2	App: the photo note's item picker offered deliveries that were already fully used (e.g. "40 m E2E Cable 4mm"), where logging usage can only fail.	Fixed in code — used-up deliveries are no longer offered; unit-tested. Not yet re-run on the emulator.
3	The dev launcher showed a crash report from 2:38 AM today (before this run): "Unable to start activity ... MainActivity". It did not happen during testing.	Open — not reproduced during the run; worth watching.
4	Live positions (Realtime Database) are readable by any signed-in user, not only site-mates. The app only asks for its own site, but the database does not enforce it.	Known gap — not changed.
5	A usage amount logged from the photo sheet is sent in the background; if the phone is offline and the app is closed before it reaches the server, that amount is lost (the photo, note and link are safe).	Known limitation.

1 · Permission rules (real accounts, live project)

Each line was attempted as the real signed-in account; PASS means the database allowed or refused it exactly as intended.

	Check
Inventory	
PASS	Crew logs a delivery at their own site (40 bags cement)
PASS	Crew logs pieces of a size (5 × 5 m wire = 25 m)
PASS	Crew logs at a site they are NOT assigned to permission-denied
PASS	Crew sneaks an extra field into a new entry permission-denied
PASS	Crew logs an entry in someone else's name permission-denied
PASS	Site-mate reads the other crew member's entry

	sees "E2E Cement OPC 53" logged by Claude Test Worker
PASS	Site-mate lists the whole site's inventory 4 entries visible
PASS	Site-mate logs usage on someone else's delivery permission-denied
PASS	Creator logs usage (10 bags, with note)
PASS	Creator logs usage but fakes the running total permission-denied
PASS	Creator tries to rename their own entry permission-denied
PASS	Creator tries to delete their own entry permission-denied
PASS	Creator uses up the rest of the wire (25 of 25 m) used 25 of 25 m
PASS	Admin corrects quantity, name, note and used amount
PASS	Admin changes "logged by" (personName) permission-denied
PASS	Admin changes "logged by" (personId) permission-denied
PASS	Admin changes when it was received permission-denied
Roles	
PASS	Plain admin grants admin to a crew member permission-denied
PASS	Crew member makes themselves admin permission-denied
PASS	Superadmin grants admin to crew member 2
PASS	Superadmin revokes it again
PASS	Superadmin changes their own role permission-denied
PASS	Superadmin makes someone else superadmin permission-denied
PASS	Plain admin deactivates the superadmin permission-denied
PASS	Plain admin changes a crew job title
Check-in / check-out	
PASS	Crew closes their own session (check-out)
PASS	Another crew member edits that session permission-denied
PASS	Admin corrects check-in/out times (marks editedAt)
PASS	Admin edits without marking it corrected permission-denied
PASS	Admin sets check-out before check-in permission-denied
PASS	Admin moves the session to another person permission-denied
Audit trail (superadmin)	
PASS	Admin writes an audit line as themselves

PASS	Admin forges an audit line as the superadmin permission-denied
PASS	Crew member writes an audit line permission-denied
PASS	Plain admin reads the audit log permission-denied
PASS	Superadmin reads the audit log and finds the admin's edit by name "E2E audit probe 2026..." by Administrator, note "E2E: corrected times"
PASS	Admin edits an audit line afterwards permission-denied
Live positions	
PASS	Crew member reads site-mates' live positions for their site 0 positions at the site

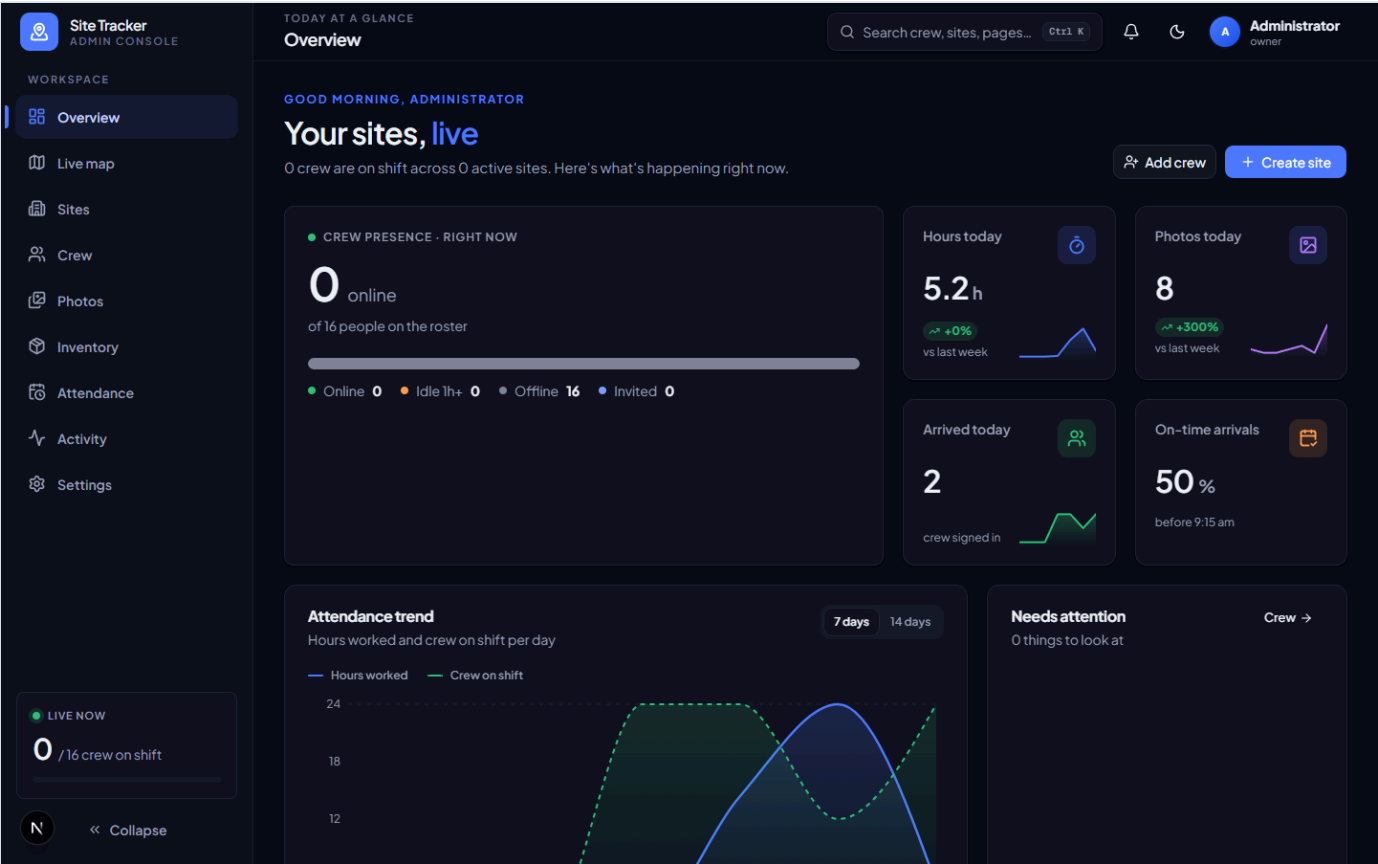

2 · Admin dashboard — admin, then superadmin

	Step
PASS	Admin signs in and sees the overview
PASS	Admin sidebar has no Admins / Audit log (superadmin-only) links: Overview, Live map, Sites, Crew, Photos, Inventory, Attendance, Activity, Settings
PASS	Admin opening /audit directly is refused
PASS	Admin opening /admins directly is refused
PASS	Inventory page shows the crew's deliveries with who logged them, used/left, pieces and "All used" found: Claude Test Worker, All used, 5 × 5 m, Received, Used, Left
PASS	Admin opens "Correct entry" — every field editable except who logged it fields: Site Item Quantity Unit Used so far Note (optional) Reason for the change (optional)
PASS	Admin corrects quantity, used, note, with a reason for the superadmin
PASS	Admin corrects a check-in/check-out on the crew profile, with a reason shows "Corrected", reason hidden from admin
PASS	Photos page loads for admin
PASS	Superadmin signs in; sidebar has Admins and Audit log
PASS	Admins page lists everyone with their role
PASS	Superadmin grants admin to Claude Test Worker 2
PASS	Superadmin revokes it again
PASS	Superadmin cannot change their own or another superadmin's role 15 role buttons enabled; own row disabled (see screenshot)
PASS	Audit log shows what the admin edited, by name, with the reasons found: E2E: recount by admin · E2E: forgot to check out · Corrected inventory · Editing check-in/out · Granting admin · Revoking admin
PASS	Audit log filter by admin works
PASS	Superadmin also has every admin page (inventory)

Sa Inventory

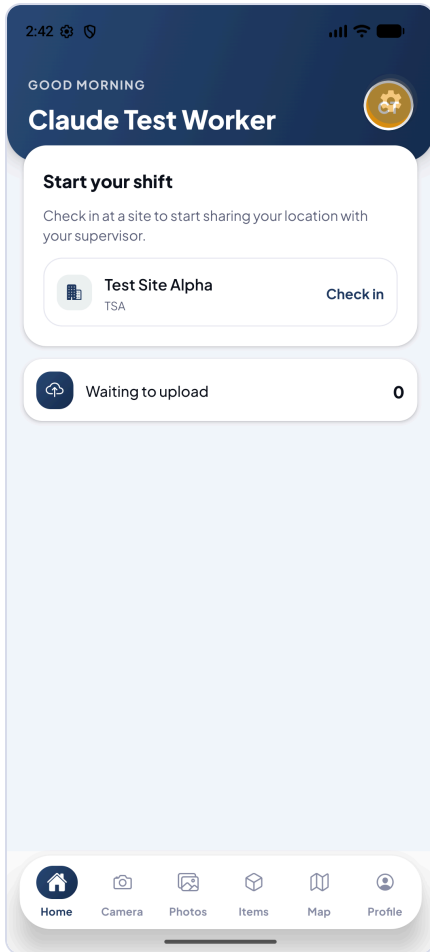

3 · Mobile app (Android emulator) — crew member and site-mate

	Step
PASS	Crew member 1 signs in
PASS	Crew member 1 checks in at Test Site Alpha crew card shown
PASS	Items tab: site inventory with "Logged by you", pieces and "All used" found: Logged by you, All used, 5 × 5 m
PASS	Log a delivery as pieces: 4 × 10 m cable
PASS	Log usage of all 40 m → shows "All used", button becomes "Done"
PASS	Camera: shoot 2 photos without interruption, tray shows both
PASS	Note for the batch + link to cement + log 2 bags used, in the same sheet
PASS	Leaving the camera uploads the batch; Photos tab shows the note uploaded / queued
PASS	Map tab shows the site map with the site-mate's pin only me placed
PASS	Crew member 2 (same site) signs in and checks in
PASS	Site-mate sees crew member 1's entries, but "Used" is locked 2 locked "Used" buttons
PASS	Site-mate taps the locked "Used" button — nothing opens
PASS	Site-mate's Map tab only me placed
PASS	Site-mate's Map tab shows crew member 1's pin while they share at the site "1 of your crew on the map", crew member 1 "Here now"

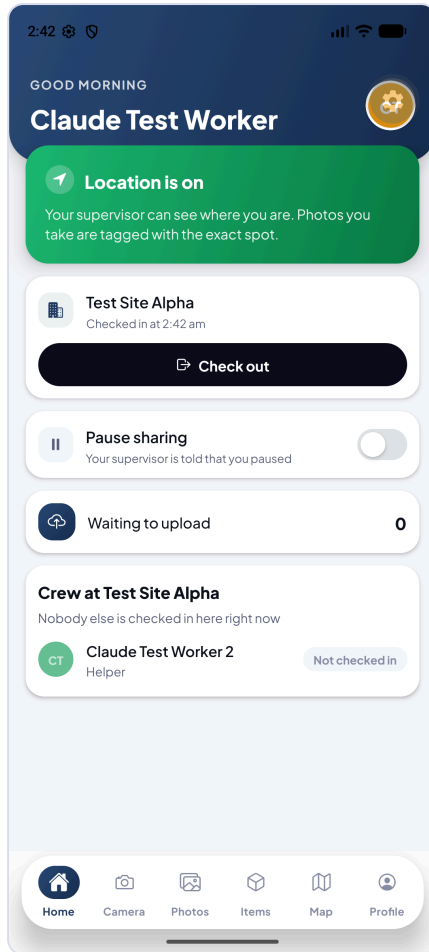

Server-side confirmation of what the app did

	Check
PASS	Both batch photos uploaded with the shared note 2 photos with the note
PASS	Both are linked to the cement delivery as proof a7gFiMyxFOaclwC6b4av, a7gFiMyxFOaclwC6b4av
PASS	Thumbnails were made for the gallery thumb ok, thumb ok
PASS	The 2 bags used were logged once, with the photo note as the reason 2 bags, "E2E pouring slab, east side"; used now 15 of 39
PASS	Pieces entry stored as 4 × 10 m = 40 m and fully used 4 × 10 m = 40, used 40

Not covered by this run

- Two real phones at the same time (both crew accounts shared one emulator; crew member 1's live position was simulated for the site-mate map check).
- Offline behaviour (airplane mode, app killed while offline), video capture, push notifications, iOS.
- The owner/superadmin experience inside the mobile app (tested on the dashboard only).
- Photo deletion end-to-end (tested in an earlier session).
- Re-running finding #2's fix on the emulator.

Test data left in the live project (as requested)

- Inventory at Test Site Alpha named "E2E ..." (cement, wire, cable), with usage and admin corrections.
- Two photos by Claude Test Worker with the note "E2E pouring slab, east side", linked to the cement delivery.
- Check-in sessions for Claude Test Worker (some marked corrected), and the account Claude Test Worker 2.
- Audit-log entries from the admin and superadmin (the audit log is append-only by design).
